

## **AMENDMENT TO THE ABSTRACT OF THE DISCLOSURE**

This Abstract of the Disclosure will replace the prior Abstract of the Disclosure in the Application:

### **ABSTRACT**

The invention provides compounds and methods for inhibition of kinases, more specifically p70S6 kinases. The invention provides compounds for modulating protein kinase enzymatic activity for modulating cellular activities such as proliferation, differentiation, programmed cell death, migration, chemoinvasion and metabolism. Compounds of the invention inhibit, regulate and/or modulate kinase receptor signal transduction pathways related to the changes in cellular activities as mentioned above, and the invention includes compositions which contain these compounds, and methods of using them to treat kinase dependent diseases and conditions.

### **ABSTRACT**

#### Compounds of formula III:

wherein R<sup>5a</sup>, R<sup>3</sup>, X, Y, Q, R<sup>1a</sup> and R<sup>1b</sup> are as defined in the specification, pharmaceutically acceptable salts thereof, and methods of use thereof.
